RE: Federal Stimulus Funds for water infrastructure projects

Ms. Mays:

In response to information letter regarding the Federal Stimulus Funds for water infrastructure projects, we would like to request funds appropriation for our company - Fort Mojave Tribal Utilities Authority.

Fort Mojave Tribal Utilities Authority operates the water and wastewater services for large portions of the greater Mohave Valley, Arizona including all the requirements of the Fort Mojave Indian Tribe. We have identified several projects which would improve the quality of water to our customers, with the three (3) most critical improvements being:

- South Valley Water Filtration Project – estimated cost \$ 2.1 Million
- Mesquite Creek Revitalization Project – estimated cost \$ 1.8 Million
- Fort Mojave Beaches Water Main Extension – estimated cost \$ 638,000

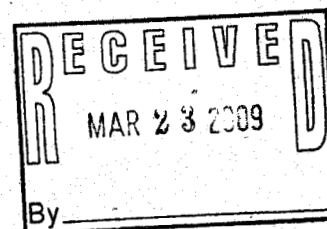

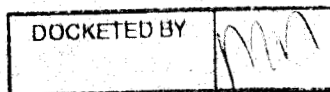

*Project outline details are available at your request.

Fort Mojave Tribal Utilities Authorities struggles with harsh water conditions and variations in water pressure. We believe these stimulus funds would allow us to make necessary improvements to our water system without imposing additional rate burdens on our customers.
